MOOD

DIFFERENT MOODS SHOOT OUT OF THIS SOLID WOODEN STRUCTURE

The spherical lamp Mood is made of several layers of birch wood, in between matt transparent, light-transmitting layers are processed. Together these layers form a dense ball or rather an ellipse.

Mood adapts to every mood and atmosphere. With a remote control it is possible to adjust the light of this lamp in different colors.

Because the wooden rings are different in hue and thickness it look like tree rings which give Mood that natural look.

This lamp, which can be used both as floor lamp and table lamp is smooth finished and is also a beautiful object when the light is off.

SPECS
